Projects

E-Commerce Website | *React js*

September 2024

- Developed a dynamic and responsive eCommerce website using React.js, implementing features such as product browsing, shopping cart, and checkout. Utilized state management with React hooks and context API, optimized component rendering for performance, and integrated RESTful APIs for seamless user interaction and real-time data updates..

Food-Odering Website | *React js*

November 2024

- Built a user-friendly food ordering application using React.js, featuring menu browsing, order customization, and real-time order tracking. Leveraged React hooks for state management, implemented responsive design for mobile and desktop, and integrated with RESTful APIs for seamless interaction with backend services, including payment processing and order management.

Amazon clone | *Html,Css*

February 2024

- Developed an Amazon clone using HTML and CSS, replicating the UI for product listings, search functionality, and responsive layouts. Focused on pixel-perfect design, cross-browser compatibility, and mobile-first approach to ensure seamless user experience across devices.
